TECHNICAL TEST – AI DOCUMENT CHATBOT (RAG)

🎯 Objective

Build an intelligent chat system that:

1. Accepts an internal document (PDF or DOCX)
2. Answers exclusively using information contained in the document
3. Does not generate or invent information
4. If the answer is not found in the document, it must reply exactly with:

   "This information is not present in the provided document."

5. Maintains conversational context (chat memory)

📘 Document to Use

(Attached file: **Operational_Manual_XYZ_Company.pdf**)

🛠️ Technical Requirements

The system must:

- Use a RAG (Retrieval-Augmented Generation) approach
- Split the document into chunks
- Generate embeddings
- Use a vector database
- Implement hallucination control
- Maintain conversational memory

📦 Required Deliverables

The candidate must provide:

1. Public GitHub repository
2. README file including:
   - Chosen architecture

- Technical explanation
- Libraries used
- Justification of technical decisions

3. Setup and run instructions
4. Screenshots or demo video
5. Total development time

⭐ Bonus (Optional)

- Source citation in responses
- Similarity score display
- Prompt injection protection
- Dockerization
- Cloud deployment
- Request logging

⏳ Deadline

7 days from receiving the test.

📊 Evaluation Criteria

- Functional correctness
- Architectural quality
- Hallucination prevention
- Code quality
- Documentation clarity

Good luck.
